

Stidham Public School
"Oklahoma's School Of The Future"
Bart Banfield – Superintendent

A Letter from an Oklahoma Superintendent

Dear Fellow Oklahoma Superintendents

My name is Bart Banfield and I am the Superintendent of Stidham Public School, which is located in the heart of McIntosh County, Oklahoma. I am writing you to share what I have found for Oklahoma State Standards Test Preparation. We are using software from Click and Learn Software company. This software, unlike most software on the market that is aligned to national objectives, is 100% aligned with the state of Oklahoma's PASS objectives.

Click and Learn is based in Oklahoma and Stidham School District has been utilizing their software for three years. During that time I have been impressed with the quality of the software and the professional attitude of the Click and Learn team. I have become friends with the Click and Learn team, but I am **NOT** a paid representative of Click and Learn. I am simply an Oklahoma school superintendent who cares about all students and who is under the same pressure that you are -- trying to get my students to perform as well as possible on the end of instruction tests.

The No Child Left Behind act has placed an emphasis on accountability. Every Oklahoma school will be given a school Report Card, A.P.I. score and told whether or not their school district made "Adequate Yearly Progress." The Click and Learn team understands this and they have worked tirelessly to put together software that is completely web-based, contains over 1000 skill builder games in subjects such as: Reading, Math, Science, History, Geography, Music, Early Childhood and so much more.

Click and Learn's newest component "State Standards" is brand new, so if you have seen a demonstration of Click and Learn in the past you probably have not seen it with the End of Instruction Oklahoma Test Preparation Package which includes over 100 Sample Tests for grades (3-12). All of these tests are web based, taken online at a computer by a student, and graded automatically by the computer.

I encourage you to go to their website at: <http://schools.clickandlearn.com/oklahoma/cc> and evaluate Click and Learn Software. Be sure to watch the video of how the Oklahoma State Standards component can help your school or just contact Kathy Reynolds, President of Curriculum Connections, Inc., by phone at (918) 473-7888 or (918) 441-8023. The Click and Learn team is truly interested in helping Oklahoma students and schools.

Yours in Education,

Bart Banfield
